The Commissioner for Railways
Brisbane.

Memo.

With reference to conversation on the way to Cleveland, I beg to quote as my authority for the price of low level platforms - viz:- about 5/- per lineal foot, the Engineer for Existing Lines letters of 3rd June '86 (No. 392) and 17th September '86 (No. C.R. 121). In the latter it is stated that platforms 2 ft 6 in above rail level in which the railway line is situated in neither bank or cutting cost 10/8 per lineal foot, and in other parts of the Lakes the price of low level platforms is quoted

quoted at 5/. 5/3. 6/. and 7/7. All my quotations are from the Engineer for Existing Lines. I cannot understand therefore why all the low level platforms should cost as much as 15/. per foot on the Cleveland branch railway.

J. F. Raccon

Traffic Manager

P.S. Will you please place this along with my report on Cleveland Ry & Pier

J. F. R.
